Tejon Ranch Company is happy to support Bakersfield College’s efforts to pursue offering a baccalaureate of applied science in Industrial Automation. Kern County ranks 35th out of 50 California counties in the percent of bachelor’s degrees (or higher) earned by residents. BC’s plans will produce a better educated population and enable place-bound local students and military veterans the opportunity to earn a baccalaureate degree needed for job opportunities. Benefiting the local community is an important value to Tejon Ranch, and our support of the BAS in Industrial Automation is consistent that value.
