To Whom It May Concern:

John Muir Charter School, in collaboration with the Farmworker Institute of Education and Leadership development, provides high school education services to young adults between the ages of 18-25 at 5 different sites (McFarland, Shafter, Arvin, Tehachapi, Cal City) in Kern County. John Muir Charter School strongly supports Bakersfield College’s pursuit of the baccalaureate degree in Applied Science in Industrial Automation. Our students as well as the Kern County communities could greatly benefit from such an opportunity. This baccalaureate degree will provide greater opportunities to all of our students as well as help boost our local economy. John Muir Charter School strives to significantly improve the academic, vocational, and life-skills of the young adults that we serve; access to this baccalaureate degree aligns with our mission.

Sincerely,

Carmen Lopez
