To Whom It May Concern:

The Wasco Union High School District is supportive of Bakersfield College and its efforts to offer a baccalaureate degree in Applied Science in Industrial Automation. Our students are in need of expanded options in fields that lead to careers currently in demand. We believe that this Bachelor of Science degree helps fill this need. This degree will not only support our graduating students but will also provide opportunities for economic advancement to the whole of the Southern San Joaquin valley. It is through programs and degrees such as this that our community can begin to exploit its’ skills and potential.

Sincerely,

Martin Lonza
Principal, Wasco Independence High School
Director of Facilities, Wasco Union High School District
